About GeoTest

GeoTest, an RMA Company, is an exciting and rapidly growing national provider of technology-enabled testing, inspection, and certification services. Our passion lies in contributing to the sustainable development of the communities we serve, making a real impact in the world around us.

As part of our team, you will be at the forefront of professional services in environmental consulting, geotechnical engineering, geophysics and subsurface imaging, pavement engineering, quality management, non-destructive testing, construction inspection, and product certification. Together, we play a crucial role in delivering critical infrastructure projects and enhancing investments in the built environment.

Position Overview

GeoTest is seeking a motivated Geotechnical Staff Engineer to join our dynamic team in either Tacoma, Arlington or Bellingham WA. In this pivotal role, you will provide essential engineering support and technical assistance throughout the design and construction phases of exciting projects. You will have the opportunity to work closely with project managers and collaborate with a skilled team, making a real impact in our geotechnical department.

If you're looking for a rewarding opportunity where you can grow professionally and contribute to innovative projects, we'd love to hear from you!

GeoTest offers a comprehensive benefits package for full-time employees including:

- Sick Pay
- Paid Vacation
- 401(k)
- Medical/Dental/Vision
- Life Insurance
- Flexible Spending Account
- Short Term Disability
- Long Term Disability
- 8 Paid Holidays
- Other Compensation (discretionary bonus)
- Educational reimbursement (subject to company policy)
- Employee Assistance Program (EAP)

Responsibilities

- Assist the geotechnical department with investigations and construction services, including report writing, engineering analysis, field observation and inspection, geotechnical calculations, and formulating recommendations.
- Review project drawings, specifications, and construction conditions to assure compliance with geotechnical reports and contractual documents, while researching and resolving construction challenges.
- Evaluate laboratory and field data for inclusion in final reports.
- Assist in the development of scope of work and proposals as directed by the Project Manager.
- Provide services for a diverse clientele, including petrochemical refineries, military bases, municipal facilities, religious organizations, and manufacturing plants.
- Collaborate with engineering, geotechnical, and construction team members on a variety of projects to solve complex problems.
- Work closely with senior level engineers and project managers to gain project management and engineering experience.
- Participates in approved continuing education to enhance job-related skillset.
- Works on special projects as requested and all other duties as assigned.
- Familiar with field work (test pits, DCPs, drilling, instrumentation & monitoring, etc.), utility locate requests, coordinating tasks, use of geotechnical software, gINT entry, and/or other work as assigned by the Project Manager.

Qualifications

- Must have a bachelor's degree in Engineering, or related field.
- Preferred qualifications include:
 - Engineer-in-Training (EIT) or Engineering Intern (EI)
 - Professional Engineer License
 - Nuclear Gauge Certification

- ACI Concrete Field-Testing Technician – Grade I Certification
- Ability to read construction plans and specifications is a plus.
- Strong organizational, computer, and math skills are required.
- Clean driving record is required.
- Ability to work outside, work independently, and be a self-starter.
- Able to travel to construction project sites and maneuver over rough and uneven terrain.
- Effective written communication skills are required. Reports must be clear, concise, and use proper grammar.
- Lift up to 50 lbs. in the form of sample bags, buckets, equipment, etc.
- Stand on a hard surface for 8 or more hours per day.
- Sit or drive for 2 to 4 hours per day.
- Lift equipment, buckets, or tools on uneven terrain periodically.

GeoTest offers a challenging work environment with a comprehensive compensation and benefits package.
